Specification

1.

The amendment filed 10 February 2004 is objected to under 35 U.S.C. 132 because it introduces new matter into the disclosure. 35 U.S.C. 132 states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: applicant has amended claim 4 to correct the inclusion of the trademark Nafion by replacing it with sulfonated PTFE. The specification does not provide adequate support for such claim language.

Applicant is required to submit documentation asserting that the Nafion may only consist of the claimed composition or to remove this subject matter from the claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2.

Claim 1-3,25,27-30,44-47,51-58 are rejected under 35 U.S.C. 102(b) as being anticipated by Reynolds et al.

Reynolds et al. teaches a bilayer coating for an electrode wherein the first layer contacts the electrode and is loaded with drug, and the overlayer inhibits the release of the drug. The coatings are fabricated from electroactive polymers, including polypyrrole.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3.

Claim 1,4,48-50 are rejected under 35 U.S.C. 103(a) as being unpatentable over Vachon et al. in view of Reynolds et al.

Vachon et al. teaches an implantable electrode having a polymer coating loaded with a drug wherein the coating may contain Nafion or polypyrrole, but fails to teach more than one layer covering the electrode.

Reynolds et al. teaches a bilayer coating for an electrode.

It would have been obvious to one skilled in the art at the time of the invention to have a bilayer coating on the electrode in order to have one coating contain the drug and another coating disposed over that to limit the release of said drug.

4.

Claim 1,25,26,27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Phipps et al. in view of Reynolds et al.

Phipps et al. teaches an electrotransport device placed on the patient's skin comprising an electrode and a hydrophobic ion exchange material, but fails to teach a bilayer coating on the electrode.

Art Unit: 3763

Reynolds et al. teaches a bilayer coating for an electrode.

It would have been obvious to one skilled in the art at the time of the invention to have a bilayer coating on the electrode in order to have one coating contain the drug and another coating disposed over that to limit the release of said drug.

Conclusion

Applicant's arguments with respect to claims 1-6,25-30,44-53 have been considered but are moot in view of the new ground(s) of rejection.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
